

## **William Johnson, Vice President of Facilities and Data Management**

William Johnson is responsible for managing all facilities programs for QPM's projects throughout the United States. Johnson also developed QPM's online data management system, which he utilizes to track data for the more than 3,000 projects facilitated each year. In addition, he is responsible for all IT aspects of the company.

Johnson began working with QPM in 1998, when he was hired as a construction manager-client representative. In this role, he successfully completed numerous retail marketing programs for 10,000 to 12,000 sites for Tosco Marketing Company/Phillips Petroleum. Other projects completed for the client included managing the SB989 compliance program for all gasoline sites in California. Additionally, Johnson completed major interior and exterior remodels on Circle K stores throughout the Southwest. This required him to work in close partnership with the real estate, engineering, category management and maintenance departments within the Phillips organization.

Prior to joining QPM, Johnson held an internship with Matt Construction, a diversified general contracting firm located in California. He served as a project engineer, working on Disneyland Theme Park and its new Tomorrowland feature. He acted as point-of-contact for the Disney client and all of the subcontractors under Matt Construction. Johnson also completed an internship with Smith Emery Engineering as a geotechnical engineer assistant. While there, he gained experience in the geotechnical engineering field, and was responsible for soil testing and overall site investigation.

Johnson is involved with various professional associations including, the American Society of Civil Engineers and the Petroleum Equipment Institute. He has Bachelor of Science in Civil Engineering from California Polytechnic State University, San Louis Obispo and received his engineer-in-training certificate from the State of California in 1999.
